SUMMARY

Software Engineer with a strong foundation in Full-Stack Development, AI/ML, and Data Analytics. Proficient in building scalable applications using Python, Java, React, HTML, CSS, PHP and more with experience in database integration, API development, and model deployment. Proficient with modern development tools and practices, including software security, automated testing, and CI/CD pipelines. Familiar with the Software Development Life Cycle in Agile environments and the Scrum framework. Passionate about designing robust systems, optimizing algorithms, and contributing to innovative, production-ready software projects.

EDUCATION

B.Sc. (Hons), Computer Science (Data Analytics)

(2021 - 2026)

Trent University, Peterborough, ON

- **Relevant Coursework:** Front-End Web Development, Back-End Web Development, Cybersecurity, Software Design & Modelling, Applied AI & Machine Learning, Database Management Systems, Data Structures & Algorithms, Modelling & Simulation, Systems Analysis and Design, Data Visualization

WORK EXPERIENCE

Sales & Technical Support Specialist

(May 2021 – October 2024)

Super Choice Kitchen Inc., Burlington, ON. (416) 568-4900 - Owner

- Developed and deployed internal software tools and automated workflows using Python, SQL, and database systems, increasing operational efficiency by 25%.
- Designed and implemented reporting systems with data visualization dashboards, reducing manual reporting time from 2 hours to under 30 minutes.
- Provided technical support for internal software systems and created technical documentation, improving troubleshooting time by 40%.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, C#, PHP
- **AI/ML & Data Science:** TensorFlow, MobileNetV2, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, Streamlit, ChatGPT API, LangChain, Jupyter Notebooks
- **Web & Application Development:** React.js, Next.js, Tailwind CSS3, HTML5, CSS, Node.js, Express.js
- **API Development:** REST APIs, GraphQL, Authentication/Authorization
- **Security, Testing & CI/CD:** Web Security Best Practices, Automated Testing, CI/CD Pipelines
- **Tools/Platforms:** AWS, Docker, Vercel, Git/GitHub, Figma, Webpack/Build Tools, Agile/Scrum

PROJECT

- **[Cheese Fat Prediction Model](#)** | *Python, scikit-learn, pandas, NumPy, Matplotlib*
 - Full data science workflow Implementing and deploying a regression model for predicting the fat content in cheese samples for food quality control, reaching a score of 86.6% on test data.
- **[AI Image Classifier](#)** | *Python, TensorFlow, MobileNetV2, Streamlit, OpenCV*
 - Built a web-based AI app for image classification with 1,000+ ImageNet categories, achieving up to 92% model accuracy in test scenarios.
- **[AI Assistant](#)** | *Python, LangChain, OpenAI API, LangGraph*
 - Created a conversational AI assistant with API integration, enabling tool-based task automation
 - Applied prompt engineering strategies, improving response accuracy by 20% and reducing latency by 15%.
- **[AI Resume Critiquer](#)** | *Python, Streamlit, OpenAI API, PyPDF2*
 - Developed a resume analysis web application with PDF text extraction, keyword matching, and real-time AI feedback.
 - Integrated NLP techniques to enhance content evaluation accuracy, improving feedback relevance by 25%.
- **[Code Practice Portfolio](#)** | *Python, PHP, JavaScript, CSS, HTML and More*
 - Developed a collection of over 5+ mini projects, including a Random Password Generator, Rock Paper Scissors game, Calculator, Encryption tools and more.
