EDUCATION

Trent University

Expected: December 2026

Bachelor of Science in Computer Science

- **Relevant Coursework:** Front-End Web Development, Back-End Web Development, Cybersecurity, Software Design & Modelling, Applied AI & Machine Learning, Database Management Systems, Data Structures & Algorithms, Modelling & Simulation, Systems Analysis and Design, Data Visualization
-

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, JavaScript, TypeScript, SQL, PHP
 - **Software:** React, Next.js, Node.js, Express.js, REST APIs
 - **Cloud & DevOps:** AWS, Docker, Git, GitHub, CI/CD
 - **Enterprise:** Power Apps, Power Automate, GitHub Copilot
 - **AI/ML:** TensorFlow, Scikit-learn, Pandas, NumPy
-

EXPERIENCE

MOR Engineering Analyst Intern

(January 2026 – August 2026)

Bank of Montreal (BMO)

Toronto, Ontario

- Architected an automation engine for BMO's Mandatory Operational Requirements (MOR) platform that synchronized verified readiness requirements, eliminating manual entry and saving **~520 hrs/yr**.
- Collaborated with multiple teams across SDLC to build ServiceNow to MOR app integrations to automate operational readiness verification, replacing manual email workflows and saving **~360hrs/yr**.
- Developed enterprise data integrations to synchronize application environment metadata from AppCAT into the MOR platform, streamlining production readiness workflows and saving **~170 hrs/yr**.
- Translated non-technical user's requirements into technical navigational features such as Back, Save & Exit, etc. and unsaved-changes warning across MOR App screens improving UX & introducing safeguards prompts to reduce loss of work and saving **~100 hrs/yr** in user workflow efficiency.
- Identified and delivered an additional 7 process and platform initiatives including role-based access control, record linking, and operational governance – bringing total impact to **~1145+ hrs/yr reclaimed, equivalent to over half a full-time employee's annual capacity**.
- Supported BMO's final operational readiness gate for enterprise software releases, collaborating with cross-functional teams to validate production readiness for applications across AWS, Azure, and GCP.

Technical Support Specialist

(May 2021 – October 2024)

Super Choice Kitchen Inc

Burlington, Ontario

- Developed and deployed internal software tools and automated workflows using Python, SQL, and database systems, increasing operational efficiency by 25%.
 - Owned and implemented reporting systems with data visualization dashboards, reducing manual reporting time from 2 hours to under 30 minutes.
 - Provided technical support for internal software systems and created technical documentation, improving troubleshooting time by 40%.
-

PROJECTS

- [MiniX](#) | **React, Vite, React Router, PHP, MySQL, REST APIs**
 - Designed and built a full-stack social networking web application with secure session-based authentication, post creation/likes/deletion, user search, and a weather widget.
 - Implemented a modular frontend architecture with reusable React components and a PHP/MySQL backend, improving maintainability and enabling scalable feature development.
- [Cheese Fat Prediction Model](#) | **Python, scikit-learn, pandas, NumPy, Matplotlib**
 - Full data science workflow Implementing and deploying a regression model for predicting the fat content in cheese samples for food quality control, reaching a score of 86.6% on test data.
- [AI Image Classifier](#) | **Python, TensorFlow, MobileNetV2, Streamlit, OpenCV**
 - Built a web-based AI app for image classification with 1,000+ ImageNet categories, achieving up to 92% model accuracy in test scenarios.
- [AI Resume Critiquer](#) | **Python, Streamlit, OpenAI API, PyPDF2**
 - Built an AI-powered resume analysis tool that parses PDF resumes and generates actionable feedback, improving feedback quality by 25% through NLP and prompt engineering.
