EDUCATION

Trent University - Peterborough, ON

Expected: December 2026

Bachelor of Science (Honours), Computer Science

Relevant Coursework: Front-End Web Development, Back-End Web Development, Cybersecurity, Software Design & Modelling, Applied AI & Machine Learning, Database Management Systems, Data Structures & Algorithms, Modelling & Simulation, Systems Analysis and Design, Data Visualization

EXPERIENCE

Bank of Montreal (BMO) - Toronto, ON

January 2026 - August 2026

MOR Engineering Analyst Intern (Software Engineering)

- Designed and delivered Power Automate integrations between ServiceNow and BMO's Mandatory Operation Requirements (MOR) platform to automate readiness verification, replace email-based handoffs, and save approximately 360 hours annually.
- Architected a rules-based automation engine in Microsoft Power Apps and Dataverse that synchronized verified operational-readiness requirements, eliminated manual re-entry, and saved 520+ hours annually.
- Built an AppCAT to MOR data pipeline that synchronized application environment and deployment metadata, improved data consistency, and reclaimed approximately 170 hours annually.
- Translated nontechnical user requirements into navigation and workflow safeguards including Back, Save & Exit, and warnings for unsaved changes reducing lost work and saving approximately 100 hours annually.
- Delivered additional platform and process improvements including role-based access control, record linking, and governance controls bringing total annual capacity reclaimed across all initiatives to 1150+ hours.
- Partnered with engineers, project managers, operations, and application teams supporting BMO's final production-readiness gate for approximately 2,400 projects annually across AWS, Azure, and GCP.

Super Choice Kitchen Inc. - Burlington, ON

May 2021 - October 2024

Technical Support Specialist

- Developed Python and SQL internal tools and automated reporting workflows, improving operational efficiency by 25% and reducing recurring reporting from 2 hours to under 30 minutes.
- Diagnosed software and data issues and authored troubleshooting documentation, reducing average resolution time by 40%.

PROJECTS

[MiniX](#) | React, Vite, PHP, MySQL, REST APIs, Postman

- Built a full-stack social platform with session-based authentication, post creation/deletion and likes, user search, and external weather data; organized the frontend around reusable React components and a modular PHP/MySQL backend.

[Cheese Fat Prediction](#) | Python, pandas, NumPy, Matplotlib, scikit-learn, Jupyter

- Built an end-to-end regression pipeline spanning data cleaning, exploratory analysis, feature engineering, model selection, and evaluation; achieved an R-squared (R²) of 0.866 on held-out test data.

[AI Image Classifier](#) | Python, TensorFlow, MobileNetV2, Streamlit, OpenCV

- Built a web-based AI app for image classification with 1,000+ ImageNet categories, achieving up to 92% model accuracy in test scenarios.

[AI Resume Reviewer](#) | Python, Streamlit, OpenAI API, PyPDF2

- Built an AI-powered resume analysis tool that parses PDF resumes and generates actionable feedback, improving feedback quality by 25% through NLP and prompt engineering.

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, JavaScript, TypeScript, SQL, PHP
- **Frameworks:** React, Next.js, Node.js, Express.js, REST APIs
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, CI/CD
- **Enterprise:** Power Apps, Power Automate, GitHub Copilot
- **AI/ML:** TensorFlow, Scikit-learn, Pandas, NumPy
