EDUCATION

Trent University

(2021 – December 2026)

Bachelor of Science in Computer Science

- **Relevant Coursework:** Front-End Web Development, Back-End Web Development, Cybersecurity, Software Design & Modelling, Applied AI & Machine Learning, Database Management Systems, Data Structures & Algorithms, Modelling & Simulation, Systems Analysis and Design, Data Visualization
-

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, JavaScript, TypeScript, SQL, PHP
 - **Software:** React, Next.js, Node.js, Express.js, REST APIs
 - **Cloud & DevOps:** AWS, Docker, Git/Github, CI/CD
 - **Enterprise:** Power Apps, Power Automate
 - **AI/ML:** TensorFlow, Scikit-learn, Pandas, NumPy
-

EXPERIENCE

MOR Engineering Analyst Intern

(January 2026 – August 2026)

Bank of Montreal (BMO)

Toronto, Ontario

- Architected an auto-population engine for the Mandatory Operational Requirements (MOR) Go-Live Framework fields, eliminating manual re-entry and saving **~520 hrs/yr** across the platform.
- Collaborated with multiple teams across BMO to build a ServiceNow to MOR app integrations to automate intake verification, replacing manual email workflows and saving **~360hrs/yr**.
- Developed data integration to auto-pull Technology Environment & Locations from AppCAT into the MOR App eliminating manual field entry saving **~170 hrs/yr** for users.
- Gathered requirements from users to design navigational features such as Back, Save & Exit, etc. and unsaved-changes warning across MOR App screens improving UX & introducing safeguards prompts to reduce loss of work and saving **~100 hrs/yr** in user workflow efficiency.
- Identified and delivered an additional 7 process and platform initiatives including role-based access control, recording linking, and operational governance – bringing total impact to **~1145+ hrs/yr reclaimed, equivalent to over half a full-time employee's annual capacity**.

Sales & Technical Support Specialist

(May 2021 – October 2024)

Super Choice Kitchen Inc

Burlington, Ontario

- Developed and deployed internal software tools and automated workflows using Python, SQL, and database systems, increasing operational efficiency by 25%.
 - Designed and implemented reporting systems with data visualization dashboards, reducing manual reporting time from 2 hours to under 30 minutes.
 - Provided technical support for internal software systems and created technical documentation, improving troubleshooting time by 40%.
-

PROJECTS

- [Cheese Fat Prediction Model](#) | *Python, scikit-learn, pandas, NumPy, Matplotlib*
 - Full data science workflow Implementing and deploying a regression model for predicting the fat content in cheese samples for food quality control, reaching a score of 86.6% on test data.
- [AI Image Classifier](#) | *Python, TensorFlow, MobileNetV2, Streamlit, OpenCV*
 - Built a web-based AI app for image classification with 1,000+ ImageNet categories, achieving up to 92% model accuracy in test scenarios.
- [AI Assistant](#) | *Python, LangChain, OpenAI API, LangGraph*
 - Created a conversational AI assistant with API integration, enabling tool-based task automation
 - Applied prompt engineering strategies, improving response accuracy by 20% and reducing latency by 15%.
- [AI Resume Critiquer](#) | *Python, Streamlit, OpenAI API, PyPDF2*
 - Developed a resume analysis web application with PDF text extraction, keyword matching, and real-time AI feedback.
 - Integrated NLP techniques to enhance content evaluation accuracy, improving feedback relevance by 25%.
